

ROCK CATS STADIUM

NEW BRITAIN, CONNECTICUT

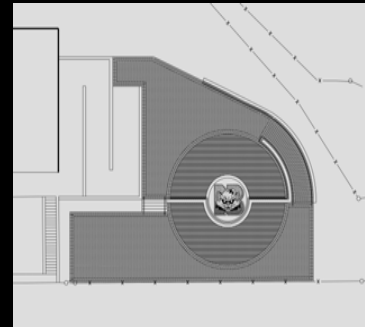

BEFORE

AFTER

LASER-CUT PAVERS

PLAN

At this existing minor league Baseball stadium, the Landscape Architect has designed a multi-level space for expanded programs including birthday parties and corporate functions. Concrete pavers reflect Rock Cat color schemes. In the center of the terrace, the team logo is rendered with laser cut pavers. The design and construction were completed in a fast track manner so that the facility would be on line for the 2005 baseball season.
